

Technology Transfer – The International Perspective

Successful translation of discovery into therapy

Heidelberg, Marsilius Arkaden, 21st October 2019, 17-20h

Register now!

Dear Ladies and Gentlemen,

Technology transfer from academia to industry is an important part of health innovation. However, the interplay between research institutions, startups, venture capitalists, and pharmaceutical companies is a complex process.

We would like to invite you to participate in an intensive after-work session, bringing together regional and international key opinion leaders to discuss best-practice and new ideas. Impulse presentations from esteemed representatives of leading academic institutions, successful life science founders, high-profile venture capital firms and global health care companies will be followed by an interactive discussion about the successful translation of academic excellence into market-ready health applications.

Join us to discuss best practice in technology transfer!

Yours sincerely,

Dr. Julia Schaft
Managing Director
BioRN Network e.V.

Dr. André H.R. Domin
Chairman of the Board
Heidelberg Startup Partners e.V.

Location

Heidelberg University
Marsilius Kolleg
Im Neuenheimer Feld 130.1
69120 Heidelberg

Parking

If you travel by car, we suggest parking in P22.

BioRN is the science and industry cluster of the Rhine-Main-Neckar region around Heidelberg, one of Germany's strongest biotech hubs. It is a non-profit network fostering health innovations and serving its members by creating a rich translational ecosystem as well as promoting, representing and connecting the regional innovation stakeholders. Our vision is to develop the region into a world-leading life science cluster attracting international investments and top global talent.

BioRN has about 100 institutional members, including the top academic and research institutions, 7 global pharmaceutical companies, a large range of small and medium-sized enterprises bolstering the life science ecosystem as well as local government organizations and interest groups. www.biorn.org

Heidelberg Startup Partners is a joint initiative of Heidelberg's leading institutes for research, education, and economic promotion. Its members include the EMBL Enterprise Management, German Cancer Research Center (DKFZ), Heidelberg Technology Park, Heidelberg University, Heidelberg University of Education, IHK Rhein-Neckar, Innovation Lab, SRH University Heidelberg, and technology transfer heidelberg.

The association aims to promote startups in the technology and knowledge-based fields in the greater Heidelberg area. For this purpose, the Heidelberg Startup Partners maintain a startup office which acts as a central contact point for people interested in setting up a business and founders from the participating institutions. The offer includes individual consultation, accelerator programs, various networking events, as well as access to an international network of industry experts and investors. www.heidelberg-startup-partners.de
