

# Together against Covid-19 Pandemic

## Company interested in cooperation:

**Profile:** [www.triga-s.de](http://www.triga-s.de)

Supporting manufacturers of diagnostic tests to plan and conduct their analytical and clinical performance evaluation for innovative COVID-19 diagnostic tests in order to obtain CE and FDA certification.

## Contact Person (Name and Position):

Dr. Jens Hain

Director Business and Clinical Development

[Jens.Hain@triga-s.de](mailto:Jens.Hain@triga-s.de)

## What can we offer:

We are offering to plan and conduct the analytical performance evaluation for your innovative COVID-19 diagnostic kit in our own S2 Laboratory. This is feasible for PCR, COVID-19 Antigen and COVID-19 Antibody detection assays.

Furthermore, we offer to plan and conduct the clinical performance evaluation for your COVID-19 diagnostic kit involving our experienced clinical operation team.

We are supporting diagnostic manufacturers to get their COVID-19 tests on the market soon according to the EU In Vitro Diagnostic Directive, the new EU In Vitro Diagnostic Regulation and US-FDA regulations.

We offer a fully equipped S2 contract-laboratory with well-established Roche Cobas analyzers, ELISA Reader, microbiology laboratory equipment and sample handling/storage facility. PCR applications can be established on demand by our experienced laboratory team.

Collection of reference COVID-19 patient samples can be organized by our experienced clinical operations team together with our partner clinics and our own logistic team
