

Together against Covid-19 Pandemic

BioRN Member interested in cooperation: BIOCRATES Life Sciences AG

Member Profile: <https://www.biorn.org/member/BIOCRATES-Life-Sciences-AG>

Contact Person (Name and Position):

Stefan Ledinger, Director Business Development - DACH

What can we offer:

Biocrates is a leading supplier in Metabolomics. The technology is suitable for use in clinical biomarker research (e.g. patient stratification), as well as along the pharmaceutical R&D cycle. Biocrates' solutions are designed to increase the likelihood of successful transfer into patient care. Metabolism is an important component of immune regulation. Published results from research on pneumonia and sepsis provide a scientific basis for the investigation of candidate biomarkers in Covid-19. Further information can be found at <https://biocrates.com/covid-19-focus/>.

Key benefits of Biocrates solutions:

- Broad coverage of metabolic pathways
- Many immunomodulatory pathways analyzed, including immune modulatory microbial metabolites
- Quantitative and reproducible results
- Innovative kit design – samples can be analyzed at Biocrates' laboratories or in a partner laboratory of choice

What are we looking for: Clinical researchers and pharmaceutical companies interested in biomarker research (predictive and prognostic biomarkers) in Covid-19
