DIVERSA

DIVERSA is a biotech company promoting the transfer to the clinic of new therapeutic molecules through the application of drug delivery nanotechnology.

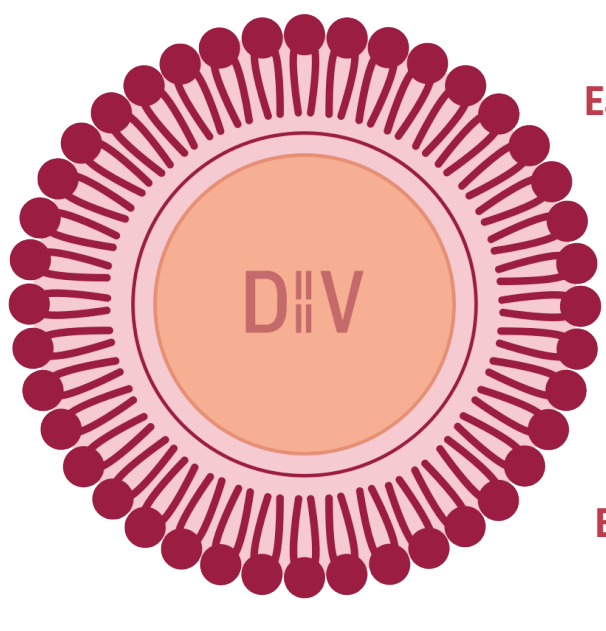

We want to build a bridge between molecules and patients, between drug discovery and clinical application.

DIVERSA aspires to become the company of reference for drug delivery, opening up new opportunities for innovative medicines and improving patients lives.

OUR TECHNOLOGY

DIVERSA are ready-to-use formulations to obtain delivery nanosystems in a fast and convenient way:

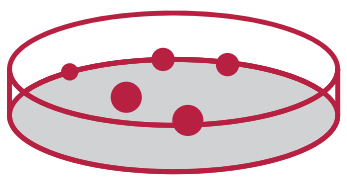

- Easy to use
- Fast intracellular delivery
- Stable in cell culture (even with FBS)
- High loading capacity
- Biocompatible

APPLICATIONS

IN VITRO

- Labeling of live cells
- Tracking cell internalization
- FRET studies
- Intracellular delivery of therapeutic compounds
- Therapeutic evaluation
- Cytotoxicity studies
- Protein replacement therapy
- Enhance molecule activity
- Reduce secondary effects
- Solve solubility problems

IN VIVO

- Biodistribution evaluation
- Therapeutic evaluation
- Cell tracking

Choose the DIVERSA Kit that better suits your molecule

Cell Tracking

DIVERSA FluoGreen Cell Internalization Reagent
DIV000F1-DIV
329€ 263.20€

Small Molecule

DIVERSA Small Molecule Delivery Reagent
DIV010-DIV
329€ 263.20€

DIVERSA FluoGreen Small Molecule Delivery Reagent
DIV010F1-DIV
329€ 263.20€

Protein

DIVERSA Protein Delivery Reagent
DIV031-DIV
430€ 344€

DIVERSA FluoGreen Protein Delivery Reagent
DIV031F1-DIV
491€ 392.80€

Peptide

DIVERSA Peptide Delivery Reagent
DIV042-DIV
389€ 311.20€

DIVERSA FluoGreen Peptide Delivery Reagent
DIV042F1-DIV
449€ 359.20€

We have optimized the technology, so that it can be packed and distributed as a ready-to-go kit, with the aim of making it available to the entire research community.

DIVERSA kits are the most convenient solution to advance your pre-clinical research.

Distributor for Germany, Austria & Switzerland
