

Together against Covid-19 Pandemic

Company interested in cooperation: Cytel

Profile: <https://www.cytel.com/>

Contact Person (Name and Position):

Dr. Lucia Santoso, Director, Business Development

What can we offer:

Pandemic response calls for speed in clinical development of vaccines and treatment options. The FDA expedites its protocol review time to 24 hours in order to enable this. We help sponsors develop innovative adaptive study design with very rapid turn-around (24-48 hours), enabling fast review and regulatory engagements. With our global network of acute care experts we also help sponsors connect to investigators.

Our COVID experience include designs of post-exposure prophylaxis study, outpatient platform trial, vaccine, ICU respiratory device as well as national epidemic planning.
