

Together against Covid-19 Pandemic

Companies interested in cooperation:

DELPHI GENETICS – Plasmid DNA production (GMP) for gene therapy

Member Profile: With a core business in plasmid DNA and genetic engineering, Delphi Genetics provides services based on unique technologies.

Contact Person (Name and Position):

Cedric Szpirer - Executive & Scientific Director

What are we looking for:

Partnership - Plasmid DNA production (GMP) for gene therapy

We are currently involved in the development of an antiviral product based on gene therapy (European consortium). We could participate to other initiatives requiring plasmid DNA or to combine part of our development to another product.
